**Subject:** Building Update - November 2, 2007

SEIU 1000 representatives toured the BOE headquarters building at 450 N Street yesterday, November 1, 2007. These representatives included an attorney and SEIU's National Director of Health and Safety. They were escorted by BOE employee job stewards. David Gau, BOE's attorney, and representatives from DGS joined in parts of the tour.

In a short meeting prior to the tour, SEIU's attorney indicated they were to tour nine floors of the building in addition to the three closed floors.

SEIU also made available to employees a paramedic and a nurse to discuss individual employee health concerns. Photos were to be taken of rashes. They also had several handouts related to mold and a survey soliciting employee input regarding medical problems. All three of those documents are attached to this e-mail.
